Today’s most innovative companies recognize that business success is directly linked to sustainability.
For more than 30 years, we’ve worked with business—at the pace of business—to advance social responsibility and sustainability priorities. Together, we craft innovative conservation solutions with each business partner to achieve a company’s unique brand and business goals. The result is measurable, cost-effective and lasting positive impact for companies, conservation and communities.

Our Approach
We believe business and conservation are strongest when they work together. We are solutions-oriented, and we don’t shy away from challenging opportunities. We work with business leaders in every industry—Dell, Dow, The North Face, CSX, U-Haul, UPS and so many more. With our partners, we are making a real difference on the ground.

Together We Can:
• mitigate your land, water and climate footprint;
• invest in people and local communities;
• engage customers, employees and stakeholders where they live, work and play; and
• ensure more sustainable supply chains.
About The Conservation Fund
At The Conservation Fund, we make conservation work for America. By creating solutions that make environmental and economic sense, we are redefining conservation to demonstrate its essential role in our future prosperity. Top-ranked for efficiency and effectiveness, we have worked in all 50 states since 1985 to protect over 8 million acres of land.

Partnerships at a Glance

Engaging U-Haul Customers to Plant Trees, Protect Forests and Revitalize Communities. 10-year partnership has helped U-Haul advance its sustainability priorities by restoring forests, capturing carbon and investing in communities. We’ve engaged more than 1.7 million customers to donate, raising $6 million to plant nearly 675,000 trees across more than 1,800 acres; trap an estimated 441,000 tons of CO₂ over the next 100 years; and build neighborhood Parks with Purpose in Atlanta, Detroit, Kansas City, Chicago and Richmond, CA.

I am extremely proud of the partnership U-Haul company has shared with The Conservation Fund over the past decade. The Conservation Fund has enabled our moving customers to offset carbon emissions from their move, enhance the beauty of the landscape they see during their move and have an overall positive impact on the environment while pursuing the dreams that moving allows.

JT Taylor
President
U-Haul International

To Get to Net Zero, Disney Protects Forests. Using high quality carbon offsets generated from our working forests, The Walt Disney Company has supported The Conservation Fund’s efforts since 2009 to help reduce greenhouse gas emissions. Disney’s industry-leading targets and investments help The Conservation Fund protect more than 74,000 acres of redwood and Douglas fir forests in Northern California. By operating the forests sustainably, we’re maintaining ecosystem services, conserving habitat for fish and wildlife, providing climate benefits and generating more than $4 million a year in economic support for the local community.

Delivering Access to Healthy Food with CSX. We’ve worked with transportation company CSX to support local organizations serving many of the more than 23 million Americans with limited or no access to fresh food. Together, we’ve increased access to fresh, local produce for families in food-insecure communities across 22 states. Since 2014, more than $300,000 has been awarded through 33 grants, enabling recipient organizations to serve 28 million meals, or 33 million pounds of food, to 90,000 families.
