

Utilizing the Find Credits Tool

RIBITS allows users to search approved banks with available credits whose service areas overlap a specified point. Click on the “**Find Credits**” button to access this tool. The results are based on service areas entered in RIBITS and will not list sources of available credits from Bank and ILF project sites without service areas. Users may narrow their search by specifying credit classifications and the type of service area desired. Only banks and sites with available credits are listed.

Information on ILF Advance credits (credits not associated with ILF project sites) may be found under the ILF Programs Button.

The credit totals shown on the ledger do NOT reflect any credit reservations or pending transactions. It is the responsibility of potential purchasers to contact the Sponsor and obtain written confirmation of credit availability.

Report Content:

The report heading describes the location and criteria of the search and includes the permit number (if entered), the latitude/longitude location, service area rank, and whether or not it included single-client banks. It also includes the State, County, 8-digit HUC, USFWS Field Office, and USACE District of the location.

For each bank found, the report lists the following information:

- Bank name
- Comments from the Bank Information page
- State
- Bank Sponsor and contact information
- Bank POC and contact information
- Available Credits for each credit classification

There is also a blank space that may be utilized for the applicant or regulator to add notes.

Searching for Credits:

Permit No

The permit number is an optional field that is printed at the top of the report. District regulators utilize this report to assist applicants in finding credits for their projects.

Search Criteria - Sources of Credits for Impact Location

Note

The filtered drop down will determine whether you have the option to search by habitats or species and will set the default lat/long to the center of the District/State/Field Office selected. If you do not specify species or habitats, the resulting list of banks will have service areas overlapping the latitude/longitude selected, regardless of which District/State/Field Office the bank is assigned to.

The results are based on service areas entered in RIBITS and may not represent all available sources of credits from Bank and ILF project sites in the area. The habitat selection is an additional filter to the service area filter and is subject to the same limitations.

Information on ILF ADVANCE credits (credits not associated with ILF project sites) can be found under the ILF Programs Button.

The credit totals shown on the ledger do NOT reflect any credit reservations or pending transactions. It is the responsibility of potential purchasers to contact the Sponsor and obtain written confirmation of credit availability.

This report includes only approved banks that have available credits.

Finding the Latitude and Longitude

The user may narrow the search by selecting a District/State/Field Office from main Filter View Section. The center point of the selected District/State/Field Office is the default latitude and longitude for the search fields. The user may also choose to adjust the latitude and longitude by using the map viewer and dragging the point to a different location. Use the additional map layers as a guide to assist in moving the point to the desired location. The latitude and longitude fields will automatically update as the point is being moved. Once you have the desired latitude and longitude, click the ‘Search’ button or enter more search criteria.

Information on ILF ADVANCE credits (credits not associated with ILF project sites) can be found under the ILF Programs Button.

The credit availability shown only reflects those credits that have actually been debited (withdrawn or sold) for a permit. Applicants should contact the bank sponsor or POC to confirm actual credit availability.

This report includes only approved banks that have available credits.

Including or Excluding Single Client Banks:

A user may choose to include or exclude Single Client Banks. Single Client Banks provide compensation for a single user like a county, military base, or state Department of Transportation (DOT). The Find Credits Tools automatically defaults to exclude Single Client Banks. To include Single Client Banks in the search, check the ‘Yes’ checkbox next the Single Client label.

Searching for Specific Credit Classifications

Narrow the search further by selecting a specific habitat or multiple habitats. Wetland or Stream habitats and Species habitat credit classifications available within the filtered jurisdiction will be available from the dropdown menus. To select more than one habitat, Click on one habitat, Ctrl + Click on a second habitat and Ctrl + click on another. The results will return approved banks with available credits, with the selected habitat or habitats, whose services areas overlap the latitude and longitude.
