

We're Losing Our U.S. Working Forests Fast

45 Million
acres

of U.S. working forests are **at risk of development and fragmentation** over the next 15 years

What's At Risk:

2.7 Million American jobs

\$112.7 Billion in U.S GDP

20% of the world's wood product supply

53% of our drinking water

Homes for 60% of at risk wildlife

Our solution: The Working Forest Fund[®]

An innovative management model that keeps forests working and protected. Here's how it works:
