## Dear Member of Congress,

The undersigned organizations respectfully request that you **cosponsor the Forest Conservation Easement Program (FCEP) Act of 2023 (H.R. 3424)**, which was introduced by U.S. Representative
Trent Kelly (R-MS-1) and U.S. Representative Annie Kuster (D-NH-2). We also urge you to support the
inclusion of the FCEP Act in the conservation title of the Farm Bill with mandatory funding. The purpose
of FCEP is to keep forests as forests through the use of conservation easements that purchase
development rights from willing private and tribal landowners to prevent conversion to non-forest uses.
Private forests in a conservation easement can remain privately owned and working.

## FCEP is designed to:

- Significantly improve and enhance the ability of the Natural Resources Conservation Service (NRCS) to effectively conserve working forests at scale through conservation easements;
- Prioritize keeping forests as forests continuing to provide a multitude of environmental, economic, and societal benefits;
- Help landowners restore, enhance, and protect habitat for at-risk species while increasing carbon sequestration; and
- Provide landowners with two proven options for placing voluntary conservation easements on their land, with one held by the federal government and one held by eligible entities and land trusts.

It accomplishes this via two program components: **Forest Land Easements** (modeled after Agricultural Land Easements under NRCS's Agricultural Conservation Easement Program) and **Forest Reserve Easements** (as the successor to NRCS's Healthy Forests Reserve Program).

Under **Forest Land Easements (FLE)**, eligible entities such as land trusts, state and local agencies, and tribes, purchase working forest conservation easements from private and tribal landowners. Landowners may continue to manage their land as a working forest. NRCS will provide up to 50 percent of the fair market value for the purchase of the easement, with the remaining share coming from any combination of cash resources from the entity, landowner donation/bargain sale, and costs associated with the acquisition of the easement. In the case of forests of special environmental significance or land owned by historically underserved landowners, NRCS will provide up to 75 percent of the fair market value. Under the proposal, 10 percent of total FCEP funding in each fiscal year would be directed towards enrolling land owned by historically underserved landowners.

Under **Forest Reserve Easements** (**FRE**), NRCS helps landowners restore, enhance, and protect forest resources by purchasing easements on private and tribal lands, while allowing landowners to continue working forest production and related uses. Enrolled land will be subject to a forest reserve easement plan that describes the practices and measures necessary to restore, maintain, and enhance habitat for at-risk species. Landowners will also have the option to enter into safe harbor agreements or similar assurances to avoid future regulatory restrictions on the use of that land under the Endangered Species Act. NRCS will purchase permanent easements from the landowner for fair market value of the easement and will provide financial assistance up to 100 percent of the eligible costs of practices and measures identified in the forest reserve easement plan. Financial assistance for 30-year easements and contracts will be 75 percent of that which would be paid for a permanent easement. Under the proposal, 10 percent of total FCEP funding in each fiscal year would be directed towards enrolling land owned by historically underserved landowners.

To cosponsor the FCEP Act of 2023 (H.R. 3424), please contact Semaj Martin-Redd (semaj.redd@mail.house.gov) in Congressman Kelly's office or Elizabeth Silvia-Chandley (Elizabeth.Silvia-Chandley@mail.house.gov) in Congresswoman Kuster's office.

## Signed,
